Pulaski City, Va., March 25, 1889.

To the Director of the Mint,
Philadelphia, Pa.,

Dear Sir: Please give me an estimate on striking say 100 of enclosed Masonic badges either on silver or an alloy. The date destroyed by the hole punched therein would have to be brought out and a blank left where the botched "L S S." appears, that purchasers of the token could have their own initials put on--that, of course, not being included in the work to be done by you. So far as known this is the only one of these badges in existence and it has been greatly sought after by Masons in both Continents. I send it by registered letter and enclose stamps for its return registry.

Very Truly Yours,

A A Christian

To the Director of the Mint,
Philadelphia, Pa.,

Dear Sir:

Please give me an estimate on striking say 100 of enclosed Masonic badges either on silver or an alloy. The date destroyed by the hole punched therein would have to be brought out and a blank left where the botched "L S S" appears, that purchasers of the token could have their own initials put on – that, of course, not being included in the work to be done by you. So far as known this is the only one of these badges in existence and it has been greatly sought after by Masons in both Continents. I send it by registered letter and enclose stamps for its return registry.

Very Truly Yours,
A.A. Christian
